PROFILE

A dedicated and skilled backend developer with experience in Laravel, APIs, and design. Cleared 10th standard in 2014 from UP Board, followed by pursuing professional courses at Red & White Multimedia Education, equipping myself with technical and design skills. Recently completed 12th standard in 2024 from UP Board. Proven ability to deliver efficient and scalable backend solutions, while collaborating with cross-functional teams to meet project objectives. Always eager to enhance my skill set and contribute to innovative projects.

WORK EXPERIENCE

Backend Developer (Laravel, APIs, Designer)

Rising Star Infotech — August 2022 to February 2024

- Developed and maintained web applications using Laravel framework, focusing on backend functionality.
- Designed and implemented RESTful APIs for various web and mobile applications.
- Collaborated with front-end developers and designers to integrate user-facing elements with server-side logic.
- Worked on database management and ensured high-performance of the systems.
- Participated in UI/UX design improvements to enhance user experience.

PROJECTS

Misrek (<https://misrek.com/>)

- Admin Customization: Modifying the admin panel, including custom functionalities and dashboard enhancements tailored to the needs of the website's administrators.
- Design Customization: Enhancing or adjusting the visual aspects of the website to align with the project's aesthetic or branding requirements.

Layana (<https://layana.co.uk/>)

- Admin Side Setup: Configuring and customizing the admin dashboard to meet the website's operational needs.
- Login and Registration Page Setup: Implementing or customizing the user authentication system, ensuring a smooth user experience.
- Frontend Data Display: Setting up the logic to display data on the frontend, making sure the content is properly fetched and rendered for users.
- Additional Tasks: Likely covering a range of other technical aspects, contributing to the overall functionality and performance of the site.
